

PRECISION IN EVERY DETAIL

Practical technology.
Distinctive by design.

A navy hexagon, a clear V and one green accent.
The binary detail rewards a closer look.

01 / THE LOGO

One identity. Two levels of detail.

Everyday / website navigation

Reverse / dark backgrounds

Use the textured mark at larger sizes.
Use one colour where colour reproduction
is limited. Keep the green tip in full colour.

03 / TYPOGRAPHY

Clear, familiar and readable.

Aa Bb 0123

Arial Regular **Arial Bold**

Website stack: Arial, Helvetica, sans-serif.
Body copy: 16px or larger. Use clear hierarchy, generous
line spacing and sentence case.

The logo wordmark is custom outlined artwork.
Use the supplied SVG. Do not recreate it by typing the company name in Arial or
substituting another font.

05 / THE HIDDEN DETAIL

A byte-sized reference.

01010110
Eight bits representing uppercase V in ASCII.
Repeated in orderly rows behind the V.
The white V stays clear and uninterrupted.

Binary is confined to the navy emblem at 23% white opacity. Use the detailed
version only when the emblem is at least **96px wide** (25mm in print).

For navigation, favicons and small documents, use the plain mark. Avoid extending the pattern
across body copy or entire pages.

Working files: public/brand/ contains SVG and transparent PNG variants. brand/source/ contains editable vector masters. Use SVG for websites and scalable artwork; PNG for applications that require
raster images.

02 / COLOUR

Navy leads. Green accents.

Deep navy #142C3B RGB 20 • 44 • 59	Accent green #BFEA75 RGB 191 • 234 • 117	White #FFFFFF RGB 255 • 255 • 255
---	---	--

■ Body #52636D □ Surface #F3F6F7

Use navy text on green, and white text on navy.
Green is an accent, not body text on a white background.

04 / SPACE & SCALE

Give the mark room.

Clear space: at least **¼ of the emblem's width** on every
side. This margin is "x".

Horizontal: 150px / 40mm min.

Symbol: 24px / 7mm

Favicon: 16px

Use the dedicated plain favicon at tiny sizes.
Check the result in the intended medium before printing.

06 / CONSISTENT USE

Keep the geometry intact.

Use: supplied proportions, palette and original wordmark.

Avoid: stretching, rotation, glow, shadows or recolouring.

Keep: the green accent on the right V tip only.

Name: Vertabyte. Legal name: Vertabyte Tech Limited.
